---

## PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering student with expertise in Full-Stack Development, Mobile Application Development, and Software Engineering. Skilled in building scalable web applications, database-driven systems, and innovative software solutions. Passionate about solving real-world problems through technology and continuously learning emerging technologies.

---

## EDUCATION

### Bachelor of Engineering (Computer Science and Engineering)

Expected Graduation: 2028

Relevant Areas: • Data Structures and Algorithms

- Database Management Systems
  - Software Engineering
  - Web Technologies
  - Object-Oriented Programming
- 

## TECHNICAL SKILLS

### Programming Languages

Python • Java • JavaScript • C

### Frontend Development

HTML5 • CSS3 • JavaScript • React.js • Tailwind CSS

## Backend Development

Python • FastAPI • REST APIs

## Mobile Development

React Native • Expo • Android Development

## Databases

MySQL • PostgreSQL

## Tools & Technologies

Git • GitHub • VS Code • IoT Systems

---

# PROJECTS

## Student Mark Management System

Technologies: Python, MySQL, HTML, CSS, JavaScript

- Developed a centralized system for managing student records and marks.
- Implemented grade calculation and performance analysis features.
- Generated reports and maintained secure database records.
- Integrated MySQL for efficient data storage and retrieval.

## E-Learning Platform

Technologies: Python, MySQL, HTML, CSS, JavaScript

- Built a learning platform with user authentication and course management.
- Designed responsive interfaces for improved user experience.
- Implemented database-driven content management.
- Enhanced accessibility and usability for students.

## E-Commerce Website

Technologies: HTML, CSS, JavaScript, MySQL

- Developed a responsive online shopping platform.
- Implemented product catalog and user-friendly navigation.
- Improved customer experience through intuitive UI design.

## IoT Gas Leakage Detection System

Technologies: IoT, Sensors, Embedded Systems

- Designed a real-time gas leakage monitoring system.
  - Implemented alert mechanisms for safety enhancement.
  - Improved monitoring accuracy through sensor integration.
- 

## EXPERIENCE

### Java Intern | MagnusVista Labs

- Worked on Java programming concepts and application development.
  - Improved problem-solving and debugging skills.
  - Gained exposure to software development practices.
  - Collaborated on practical programming assignments.
- 

## ACHIEVEMENTS

- Successfully completed Java Internship at MagnusVista Labs.
  - Developed multiple academic and real-world software projects.
  - Built full-stack applications using modern development technologies.
  - Participated in project-based learning and technical problem solving.
- 

## SOFT SKILLS

- Problem Solving • Team Collaboration • Communication • Adaptability • Critical Thinking • Time Management
- 

## LANGUAGES

- English • Tamil
